NEW! Green Living Roofs

The Green Living Technologies Int. (GLTi) Professional Installer training is part of the GLTi green roof, green wall and urban agriculture Certification Program supported by the Department of Education. This two-day training module includes hands-on demonstration sessions, day one covers green roofs and day two covers green walls and vertical agriculture. Through this two-day course, you will have the basic skills to understand the technology and basic application of green roof and green walls. Who should attend? Anyone who wants to fully understand the science and modern technology behind green roofs, roof top gardens, green walls and vertical agriculture.

Note: Text is included in course fee. Course topic areas include the following:

- History of green roofs and walls
