

## Waterproofing Q & A

Q. Who is responsible for the waterproofing installation?

A. GLTi

GLTi will oversee and approve the waterproofing installation as a field supervisor for one of thousands of GLTi Certified Installers prior to the vegetation being installed, making notes of seams and areas prone to periodic inspections as part of the green roof maintenance.

Q. Who is responsible for the green roof installation?

A. GLTi

The Certified installers are also Certified GLTi Green Roof installers. The GLTi installers are a single source professional. Caring for the waterproofing and vegetation will guarantee the protection and professional installation for both components.

Q. Who is responsible for the maintenance and vegetation?

A. GLTi

Since the patented GLTi green roof with water wicking technology comes complete with vegetation and is installed 100% mature the long term maintenance is lower than the planted in place systems or systems that require overhead irrigation. GLTi holds all maintenance agreements and are fully responsible for the upkeep and maintenance of your green roof.

Because GLTi installers are also waterproofing installers part of our maintenance package INCLUDES periodic removal of the green roof to inspect the waterproofing. It is like having two professionals at each maintenance visit.

Q. Who is responsible for the overburden removal?

A. GLTi

Since GLTi will also perform the needed inspections and repairs to the waterproofing it is simple! GLTi includes the overburden removal.

Q. If my waterproofing needs repair who do I call?

A. GLTi

Since GLTi performs the full service for all your roof needs, you will simply call our office for waterproofing or vegetation issues!
