GREEN LIVING TECHNOLOGIES CERTIFICATION TRAINING ITINERARY AND OUTLINE

Welcome to the Green Living Technologies Installer Certification Training. (ICT) The ICT will teach you about the Patented Green Living Roof systems, Green Living Walls, Urban Agriculture, waterproofing, simple irrigation, and maintenance, sales and quoting for profit.

The GLT ICT is designed as the pre-courser to more advanced training. Upon completion you will be able to understand:

- History of green roofs and walls
- Identify various roof membranes and waterproofing
- Recommend a roof membrane and waterproofing
- Identify the three common types of green roof systems
- Introduction to the patented Green Living Roof Panels and Trays
- Compare the Green Living Roof Panels and Trays to others, pros and cons - apples to apples
- Applied the Green Living Roof panels and Trays to roofs less than 20°
- Introduction to the Green Living Wall
 - Bracket system
 - Freestanding systems
 - Agriculture and produce, GLT food factories
- Common installation techniques of the Green Living Wall
- Compare the Green Living Wall to others, pros and cons
- Introduction to plant material & Growing Media
 - Pre - grown green roofs / walls
 - Other green roof plants (intensive and hybrid)
 - Green wall plants and their relationship to green wall depth
 - Edible crops and the Green Living Wall
- Green Living Technologies and LEED
- Various irrigation options
 - Green Walls
 - Green Roofs
- Green roof and wall maintenance
- Recommend a product line based on budget function and client expectations
- How you can add these skills to your existing business
- Budget projections for profitability
- Working with unions, occupational safety organizations
- Hands-on green roof and wall installation
